EDUCATION

ARAVALI INSTITUTE

- B.tech Computer Science and Engineering (Artificial Intelligence) (8.3 cgpa)

2018-2022

VIDYA BHAWAN PUCLIC SCHOOL

- Senior Secondary Education
- Secondary Education

SKILLS

- Python Programming (libraries
 - Django, Pandas, Numpy, Matplotlib, Sk-learn, tensorflow, LangGraph, crewAI)
- Html, CSS
- Javascript(React js, Next.js)
- DBMS (My SQL,, Qudrant)
- AWS(basics), Hugging Face
- Docker and kubernetes

TOOLS

- AI tools(codex, chatgpt, replit, claude)
- Canva
- Excel, Power point
- Adobe Express

SOFT SKILLS

- Communication (English-Fluent, Hindi)
- Fast-learner, Problem Solving

HOBBIES

- Sports- Football, cricket, Chess.
- Reading- current affairs, tech and finance news.

PROFILE

Final-year B.Tech student specializing in Computer Science and Artificial Intelligence with strong foundations in software development, machine learning, and full-stack web technologies. Experienced in building dynamic web applications, working with modern frontend and backend frameworks, and developing AI models for data-driven solutions. Looking for opportunities to contribute to innovative teams in web development or AI-focused roles.

INTERNSHIP

ANWIMAC Technologies Pvt. Ltd.

Completed a 45-day internship at ANWIMAC Technologies Pvt. Ltd. (June 2025 – July 2025) in the IT Department, where I worked on web development projects using Django and JavaScript. Contributed to backend logic implementation, frontend integration, and feature development. Demonstrated strong learning ability, punctuality, and teamwork throughout the internship.

(Ref No. Aim-456)

PROJECTS

◆ RAG-Based AI Web Application

- Django, Next.js, Qdrant, SentenceTransformers, OpenAI API
- Built a full-stack Retrieval-Augmented Generation (RAG) platform for querying user-provided PDFs/APIs.
- Implemented text chunking, embedding generation, and vector storage for semantic search.
- Enabled role-based AI responses using contextual retrieval.
- Designed scalable backend with authentication and data isolation.([Project link](#))

◆ Personalized LLM (Fine-Tuned Chatbot)

- Python, Transformers, PyTorch
- Fine-tuned a transformer-based language model on custom chat + Atlas dataset.
- Built preprocessing, tokenization, and prompt engineering pipeline.
- Improved contextual consistency and response personalization.

◆ AI-Powered Stock Market Trading System

- Python, Pandas, scikit-learn, NLP
- Developed hybrid trading model using technical indicators + sentiment analysis.
- Engineered time-series features and performed backtesting.
- Integrated risk management with stop-loss and allocation strategies.([Project link](#))
